English

PROFILE

I am 17-year-old student from Oulu who is ready to take responsibility and show diligence in her work. Although I do not yet have extensive programming experience, I am motivated to learn and improve my skills as a software developer. I am open to new challenges and ready to work as a team member to achieve common goals. I have good communication skills and the ability to adapt to different work environments. I am ready to contribute and learn new things at my workplace, no matter what the job is.

KNOWLEDGE

Olen perehtynyt alla oleviin sovelluksiin ja koodikieliin:

Applications:

- GitHub
- Unity

Coding languages:

- C
- C#
- SQL
- HTML
- CSS

PROJECTS

I've been involved in a few game projects during vocational school. The games can be found on the site under the name "Itch.io":

- Cloud Dodge (2D, Mobile, Android)
- Sparkle Land (3D, Windows)

WORK EXPERIENCE

Job practice at an electronics store

Power, Limingantulli

2.5.2022 - 17.6.2022

- I wasn't qualified to help customers with complicated things so I guided them to the right path, either by fetching a salesperson, or if I knew how to help, I guided them myself.
 - For example, if the customer asked for a price for a product, or where a product was located.
- I maintained cleanliness, and arranged the shelves.
- I unloaded products and put them to shelves.
- I put lots of electronic price tags to shelves.
 - If the price was not clearly visible on the shelf, or was missing completely, I put new ones on my own.
- I installed Windows to few laptops.
- I helped the salespersons with other simple things.
